

Moth Cocoon

Care Instructions

Congrats on bringing home a new cocoon! Your moth should emerge in 2-6 weeks.

Hatching Instructions:

- Remove the cocoon from the plastic cup and place it in a large container (at least 6" wide).
- Add a twig or paper towel for a rough surface to cling to.
- Once it emerges, avoid touching it for 3+ hours to allow the wings to dry fully.

Releasing Your Moth:

- Once the wings are fully dry and inflated, release it outside.
- To keep your moth indoors, house it in a large enclosure. Adult moths do not eat. It will live 5-14 days.
